

Configuring an un-scanned Email Account in BarricadeMX

1. Use the web interface to navigate to: **Setup >> MailScanner >> General [tab]**

2. Then Select the **Exceptions** button for **Scan Messages**

3. Select **To:** for the Match Type and enter the email address in the **Text Box**

4. Select **No** for the **Result**

5. Select The **Add** button

6. Then on the Main Screen select the **Update** Button

Then select the **Config Changes** and **Apply Changes** buttons as they appear on the main web page.

Next

1. Use the web interface to navigate to: **Setup >> Access**

1. Add the Key **to:tester@domain.com** (substitute your email address for tester@domain.com)

2. Add the Value **OK**

3. Select the **Add** button
